EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Master of Computational Data Science (MCDS)

Dec 2024

GPA: 4.15/4.00. Courses: DL Systems (PhD), On-Device ML (PhD), Intro to DL (PhD), Cloud Computing (MS), Intro to ML (MS)

PES University

Bangalore, India

Bachelor of Technology in Computer Science and Engineering

May 2023

GPA: 9.84/10.00. Courses: Natural Language Processing, Machine Intelligence, Data Analytics, Big Data

Awards: Prof. CNR Rao Scholarship (top 2%), Immense Contribution Award

EXPERIENCE

Microsoft AI

Redmond, WA

Data & Applied Scientist

Mar 2025 – Present

- Distributed training, large-scale ETL, daily retraining, feature engineering. Conversion modeling with counterfactual objectives.

Microsoft AI

Redmond, WA

Data & Applied Scientist Intern

May 2024 – Aug 2024

- Scalable model-agnostic hyperparameter optimization and neural architecture search. Deployed lightweight NNs achieving 99% baseline performance with 1.67% parameter count.

Apple

Bangalore, India

Machine Learning Intern

Jan 2023 – Jun 2023

- Created a few-shot multi-label text classifier for iOS cellular error log reports. Improved F1 score by 0.35 and deployed for online inference. Semi-automated data annotation of NL descriptions of cellular errors in Apple's iOS platform.

Goldman Sachs

Bangalore, India

Summer Analyst

Jun 2022 – Jul 2022

- Designed new efficient document data models in MongoDB to store mathematical constraints for linear optimization models, replacing old SQL data store and reducing fetch times by 85%. Created fetch API backend with FastAPI.

RESEARCH/PROJECTS

PyTorch Clone (needle) | CMU, Deep Learning Systems

(Python, C++, CUDA, Metal)

- Neural Network library with CUDA, Apple Silicon, and CPU backends, supporting standard initializers, modules (linear, conv, TransformerLayer), and autograd. Achieved matmul speedup of 80x with Apple Silicon and 52x speedup with CUDA (T4).

Distributed Analytics on the Cloud | CMU, Cloud Computing

(Java, Spark, ETL, AWS, Databricks)

- Developed 3 distributed, efficient microservices: blockchain mining & verification, QR code, and Twitter user rec system.
- Performed large-scale ETL to reduce 1TB of raw data to 35GB. Serves 230,000 requests per second within budget of \$1.28/hr.

Interpreting Mathematical Reasoning | CMU, Advanced NLP

(HuggingFace, PyTorch)

- Using sparse autoencoders to study mathematical reasoning abilities in LLMs.

Efficient Pre-training of Language Models | Capstone Project, Advisor: Emma Strubell

(HuggingFace, PyTorch)

- Formulating "lazy pre-training", a method to grow model parameters from a smaller size to a larger size in a function-preserving manner and then continuing pre-training with fewer parameters and less data/compute.

On-Device Image Captioning | CMU, On-Device Machine Learning

(CoreML, HuggingFace, PyTorch, Swift)

- iOS app that uploads a picture from camera roll and runs an int8 quantized image captioning model (BLIP) on-device.

SKILLS

Programming Languages: Python (proficient), Java (intermediate), C/C++ (moderate), R (moderate)

Machine Learning: PyTorch, pandas, numpy, scikit-learn, HuggingFace, NLTK, Keras, TensorFlow, CoreML

Cloud: Azure, GCP, AWS, Git, Azure ML, Vertx, React, Regex, MongoDB, SQL, large-scale ETL
